

ZCG Planet File Software

Planet File Radiation Patterns for Antennas

With our ZCG Planet File Software installed, you will be able to open, view and print the Antenna Radiation Patterns generated on our test range by our Technical Services Department. These patterns are saved in a “pla.” file format.

ZCG Scalar Planet File View and Print Software Version 12.2

[Click to download ZCG Planet File Software – 1.2Mb](#)

Save the zcgplot_v122.zip file to any folder on your PC and run it to install ZcgPlot.

ZcgPlot can read and display the following file types:

- NSMA WG16.99.050
- PLANET
- ANT
- ADF (read only)
- NSMA WG16.89.03 (read only)

We supply .nsma radiation patterns on the individual antenna specification pages. ZCG can supply individual Radiation patterns in the above listed formats, where no radiation pattern is available on our product. [Contact us directly for more information](#)
